

# Silver Peak Security Advisory

## Notification

### Issues related to SNMP Public Community

**CVE-2019-16102 originally published by the SD-WAN “new hope” team on Sep 8, 2019**

**CVE ID:** CVE-2019-16102 Silver Peak EdgeConnect SD-WAN before 8.1.7.x has an SNMP service with a public value for rocommunity and trapcommunity.

### Summary

Silver Peak EdgeConnect ships with SNMP default community string "public" for “rocommunity” and “trapcommunity.”

### Recommended Action for Silver Peak Customers

None – SNMP is disabled by default. If enabled, the user is forced to enter a community string. We recommend using SNMPv3 for additional protection.

### Applicability to Silver Peak products:

Silver Peak product(s)	Applicability
Unity EdgeConnect, NX, VX	Applicable
Unity Orchestrator	Not Applicable
EdgeConnect in AWS, Azure, GCP	Applicable
Silver Peak Cloud Services	Not Applicable
