Core Elements

Logo, Colors, Typefaces, Imagery, Voice, Tone, and Clear Space. These are the building blocks of the Silver Peak Corporate Identity System. They are to be used for communication at every touch point on the customer journey and across all media. Creative use of Core Elements allows for differentiation and flexibility in communication.

Objectives of the Brand Playbook

The primary objective of the Brand Playbook is to align the Silver Peak brand strategy to our aspirational goals as a company.

Brand stewardship is not only the responsibility of the company — it evolves through the customers that draw meaning from it. The brand isn’t what the company says it is — it’s what they say it is.
What Does the Creative Platform inform?

The brand values, personality, attributes and promise are intended to better inform each touch point on the customer journey, such as:

- The look and feel of our website
- The tone of copy, communications and blog posts
- Our overall marketing strategy
- The way we communicate with our teams

What We Value

At Silver Peak, we are always up for a challenge. We are at our best when rethinking the possible.

Our values are grounded firmly in being trustworthy, honest and reliable. Integrity is the cornerstone of the Silver Peak brand.

Success is more rewarding when it is shared. At Silver Peak, we empower others through information. That’s why our customer’s success is our success.

The strongest customer relationships are those that are aligned with values and goals. That’s why technology that increases productivity and is easy to use is a key element of our approach to simplifying and rethinking networking.
How Positioning Applies

Positioning is how we need to be thought of in the minds of our most important audiences in order to be successful. Positioning should be a differentiated, motivational and sustainable thought. It is not just our definition or how we express it (taglines, messages, etc.), but it should serve as the conceptual core for all that we say and do. It’s about what we want people to feel when they experience Silver Peak and remember when they walk away.

Brand Attributes

Dependable  Fast
Proven      Focused
Trusted     Problem Solvers
Thought Leaders Always Delivering Value
Innovative

Brand Personality

Gritty       Tenacious
Courage     Approachable
Inquisitive  Collaborative

Brand Tone

Accessible  Optimistic
Knowledgeable  Humble
Genuine     Respectful
Open
HELP

DESCRIPTION

Logo & Marque

This Brand Playbook is accompanied by the Silver Peak Logo in a range of formats including .EPS, .AI and .PNG.

Silver Peak logo

A. On the lighter color backgrounds (i.e., gold), the black version of the logo is used.
Logo Variations

This Brand Playbook should be accompanied by the logo in a range of formats including .EPS, .JPEG and .PNG.

Logo usage may vary, there are 2 alternative versions of the logo, one for light and one for dark as shown below.

Solid black is best used on light background colors when the three or four color logo isn’t appropriate.

Solid white is best used on dark background colors.
Clear Space

HELP

The necessary clear space is equal to the height of the “a” in the logo. If the logo appears without the company name, give half the logo height to clear space.

DESCRIPTION

Clear space is the minimum amount of space around the logo into which no other object should infringe.

MINIMUM CLEARANCE

A.

The clear space is 50% the width of the logo when stacked.

B.

The clear space is 100% the height of the “a” in the Silver Peak logo.
**Logo Design**

**Logo Size**

The minimum size of the logo is 120px wide (1 inch) when locked up horizontally and 80px wide (3/4 inch) when locked up vertically.

The logo can be locked up in two different ways: horizontally (ideal for web) and vertically.

---

**Logo Locked Up Options Minimum Heights**

80px
Incorrect Logo Usage

The logo is provided in multiple formats such as .ai, .eps and various final art to include jpeg and png. While it is tempting to add drop shadows and different color variations, please refer to this document for proper usage.

Examples of incorrect logo usage.

1. Do not re-orient any part of the logotype
2. Do not outline the logo
3. Do not stretch or skew the logo
4. Do not change any typeface within the logo
5. Do not use background colors that inhibit the legibility of the logo
6. Do not use the logo on busy photographs that obscure the logo
Incorrect Logo Usage

The logo is provided in multiple formats such as .ai, .eps and various final art to include jpeg and png. While it is tempting to add drop shadows and different color variations, please refer to this document for proper usage.

Examples of incorrect logo usage.

- Do not change the proportions of the logo or the type
- Do not apply drop shadows or other effects to the logo
- Do not remove any piece of the logo
- Do not change the colors of the logo
- Do not rotate or tilt the logo
- Do not add shapes or outlines that could be misconstrued as an element of the logo
**Trademarks**

**DESCRIPTION**

Always add the registered trademark symbol to the first appearance of “Silver Peak” in text that is not in a title, headline or subhead.

When using the Silver Peak logo, always use the version with the registered trademark symbol.

Color Tints

In color theory, a tint is the mixture of a color with white, which increases lightness.

Tints are useful in printing as they reduce costs by negating the need for additional color plates.
Color Tints

Tints are useful in printing as they reduce costs by negating the need for additional color plates.
EXECUTIVE SUMMARY
Software-driven wide area networks (SD-WANs) are enabling today’s geographically distributed enterprises to make the transactional promise of cloud computing—reduce capital and operating costs, provide the highest quality of experience for employees and customers, and adapt quickly to changing business requirements. But cloud computing and business-first networking introduce new security challenges. These include:

- Protecting data in transit across public network links
- Directly connecting users in branch offices to applications using the internet (“internet breakout”)
- Overcoming a lack of visibility into dynamic application environments
- Complying with requirements for network and application segmentation

A key benefit delivered by an SD-WAN is the ability to actively utilize low-cost broadband services. However, because broadband services are “public” instead of “private,” advanced security capabilities are required to ensure the confidentiality and integrity of application traffic traversing such connections. By segmenting networks into zones that span LANs and WANs, SD-WANs isolate traffic and minimize the attack surface to help compliance with industry standards.

The Silver Peak Unity EdgeConnect SD-WAN Edge Platform Powers a Self-Driving Wide Area Network for Cloud-First Enterprises

A Sea Change is Upon Us
A sea change is upon us, and that sea change is the migration of applications to the cloud. While every enterprise’s digital transformation journey is different, a recent Forrester study found that 78 percent of companies have already migrated to the cloud. According to a recent global study, Silver Peak and Forrester found that 62 percent of respondents have deployed such services in the cloud, with 57 percent of respondents having moved to a cloud-based SD-WAN in the last year. With many enterprises continuing their cloud migration, some have already moved 50 percent of their applications to the cloud and have created operations teams that span both direct and cloud-based networks.

While the majority of enterprises have moved applications and IT infrastructure to the cloud, many have yet to realize the full promise of the cloud.
Font Usage in Brochure

Nexa Slab fonts should be used sparingly in major heading levels as shown below. Open Sans should be used in all other circumstances.

Our People and Partnerships

Our employees, channel partners and technology alliances are extraordinary. Together we create sustainable growth and happy customers.

CRN has distinguished our CEO, David Hughes, in its List of Top 100 Executives. Our executive management team comprises seasoned professionals, and most of them have been leading the company for at least a decade.

Our employees are committed to our vision and passionate about the work they do. For example, our engineers hold at least 50 patents pending or awarded for their Silver Peak WAN innovations. We are currently increasing our R&D investments in further SD-WAN innovations.

Our award-winning and growing channel sales program enables us to extend our reach to customers around the world. Silver Peak has established value-added resellers and service provider partners in more than 80 countries.

We provide our resellers with best-in-class WAN solutions and the channel programs that they need to best serve customers. CRN has named our channel sales and marketing leaders to its prestigious list of CRN Channel Chiefs for consecutive years. Silver Peak is the WAN company best positioned to help its resellers succeed and drive future growth.

Silver Peak also has the advantage of strategic technology alliances with leading networking, security and storage/SAN companies, which enable us to further develop and deliver solutions that extend the value of the WAN for our shared customers.
Type Hierarchy

The typographic hierarchy is saved as paragraph styles and can be edited/viewed here Window > Style > Paragraph Styles

**HELP**

**DESCRIPTION**

**Headlines**

This is a versatile font-size. It can be used for page headers, section headers and even small sections of type. (i.e. indents & quotes). For font-sizes larger than 20pt, tracking should be set to -20.

**HH1 — Heavy Headline 1**

This is the largest of the title font-sizes. Use sparingly — only a couple of words/page. For font sizes larger than 30pt, tracking should be set to -25.

**H1 — Headline**

H1 is the largest header font-size for web use. It’s great for short lined page headers.

**H6 — Headline**

H6 is the smallest font-size for web use. It’s great for lower level headlines.

**BC — Body Copy**

The main font-size used in any printed document should not be less than 10pt. For web use, no less than 16px font height (font-size: 16px;) should be used.
Web Type Usage

HELP

All browsers aren't created equal. Web safe fonts should be used as a fallback when using non-standard fonts on websites.

RESOURCES

WEB SAFE FONT COMBINATION

The font-family property should hold several font names as a “fallback” system, to ensure maximum compatibility between browsers/operating systems. If the browser does not support the first font, it tries the next font.

Start with the font you want, and end with a generic family, to let the browser pick a similar font in the generic family, if no other fonts are available:

$body-copy {font-family: "Open Sans", Helvetica, Arial, sans-serif;}

Nexa Slab Font

Font Name
Nexa Slab

Classification
Slab Serif

About
Nexa Slab is a geometric slab serif font whose design is based on the already popular best-seller Nexa.

The font family contains 3 basic forms: italics, obliques and uprights, each of which has 8 different weights. This visual richness makes it the ideal slab serif font family for the web as well as for print, for motion graphics, logos, t-shirts and so on. It is also great for headings, fitting nicely with both small and large typesetting text blocks.

About
Open Sans is a humanist sans serif typeface designed by Steve Matteson, Type Director of Ascender Corp. This version contains the complete 897 character set, which includes the standard ISO Latin 1, Latin CE, Greek and Cyrillic character sets. Open Sans was designed with an upright stress, open forms and a neutral, yet friendly appearance. It was optimized for print, web, and mobile interfaces, and has excellent legibility characteristics in its letterforms.

Imagery

A select group of royalty-free images reflecting the Silver Peak brand are available for download. Any Silver Peak staff can use the library but any outside vendors will need their own license.

Imagery, in a literary text, is an author’s use of vivid and descriptive language to add depth to their work. It appeals to human senses to deepen the reader’s understanding of the work. Powerful forms of imagery engage all of the senses.
Sample Abstract Imagery

Images should be downloaded in the highest possible resolution. For print they should be saved at 300dpi.

The environmental photographic style is bold and fresh with streaks of light. The hues should be close to the Silver Peak primary color palette, and are vibrant with cool undertones or highlights. The imagery is meant to symbolize speed, efficiency and connectivity.

**Image 1**
Speed, Performance and Transformation

**Image 2**
Enterprise and Aspirational Growth

**Image 3**
Data Movement and Innovation

**Image 4**
Enterprise and Aspirational Growth
Sample People Imagery

Images should be royalty free when possible.

The images of people are shot using a shallow depth of field. The lighting is warm with a soft glow. The hues seen in the skin tones are warm while the surrounding environment and clothing are cool with blues and grays as seen in the denim shirts and office interiors. The models are focused, approachable and authentic, and the attire is casual with a slightly rough edge or grit. People have been photographed in the moment, and appear to be unaware of the camera.

Partner Communications and Branding

The Silver Peak Partner Branding section is designed for the Silver Peak partner ecosystem and event sponsors. Please distribute these guidelines within your marketing organization to ensure your marketing materials align with the Silver Peak corporate identity guidelines. Through these guidelines, we empower our partners to effectively reference and co-market the Silver Peak brand and create clear and effective marketing content.
Collaborating for Success

As a Silver Peak partner, please comply with the Silver Peak corporate identity guidelines for partners, applying them in the use of the Silver Peak brand, logos, trademarks, domain names and creative assets. The Silver Peak corporate identity guidelines for partners are subject to change. Partners are responsible for ensuring all branding and related marketing materials, press releases, and online assets and communications remain consistent with current policies.

Silver Peak may require partners to change and/or remove any branding material it deems to violate the corporate identity guidelines for partners. Silver Peak may request changes to branding assets that do not adhere to the guidelines including corporate and/or product name(s), domain names, social media assets, signage, printed promotional materials, partner website copy, logos, product descriptions, demos, trade show booth design, messaging, and other materials. Costs associated with bringing materials into compliance with the Silver Peak corporate identity guidelines for partners shall be the sole responsibility of the partner.
When co-branding standard Silver Peak collateral including data sheets, solution briefs, use case documents, or white papers, please use the approved co-branding template. Co-branding a standard piece of collateral affects the cover page and the footer area at the bottom of the last page—all other pages in the document remain unchanged.

See the example and guidance shown on the right.

To request a co-branded document, please go to www.partners.silver-peak.com

When adding another company's logo:

- Use the adjusted title box design that accommodates two logos
- Use a .5 pt vertical white line between the two logos
- Place the logo exactly .28" to the right of the white vertical line
- Align both logos vertically using the visual center of each logo
- Use a reversed (solid white) logo with a transparent background
- The second logo should be visually equal in size to the Silver Peak logo
- The final co-branded document should be delivered as a PDF

Introduction

Introduction of SD-WAN technologies is accelerating. According to a recent report by IDC, the SD-WAN market is projected to reach $4.1 billion worldwide in 2025. The report also predicts the SD-WAN industry to grow at a compounded annual growth rate (CAGR) of 30.5 percent from 2020 to 2025, and that is drawing considerable attention to this new wave of architectures and deploying WAN infrastructure by enterprises of all sizes.

Additionally, a survey conducted by Frost and Sullivan in April revealed that 73 percent of respondents considered SD-WAN as a priority for their organizations. The survey also revealed that the remote on-site equipment (ROE) expectations are also larger—45 to 55 percent taking WAN expenses—in companies with 50 or more sites.

As SD-WAN technology continues to evolve and become more widely deployed by larger enterprises, greater deployment flexibility and agility are paramount. For the type of more complex organizational structures of large enterprises, this is particularly true for those enterprises with multiple locations.
Co-branding Logo Size and Placement

The placement and size of each logo is contingent upon the relationship between Silver Peak and the partner company.

**Equal Partnership**

Both companies have equal roles in the partnership and delivery of the communication.

**Unequal Partnership**

One company has a lead role in the communication or partnership, and the second company plays a secondary role.

---

Company XYZ, a Silver Peak partner, has integrated the Unity EdgeConnect SD-WAN edge platform at dozens of leading companies.

The secondary company logo is 50-75% the size of the lead company logo.
Partner Marks and Certification Badges

DESCRIPTION

Partner Marks

These branded marks visually represent the type of relationship Silver Peak has with a partner.

Use these marks on a partner company:

- Website
- Marketing materials
- Awards or plaques
- Business cards and letterhead

To access partner marks, go to www.partners.silver-peak.com

Always place partner marks on a solid white background.
Partner Marks and Certification Badges

Certification Badges

These certification marks visually represent the level or type of certification a partner employee has achieved.

Use these badges on a partner company:

- Business cards and letterhead
- LinkedIn page
- Other personal social media pages

Certification badges are distributed upon the completion of certification courses.

To download certification badges, go to www.partners.silver-peak.com

Always place certification marks on a solid white background.

Full-size certification badges:
